

Linx Technologies  
159 Ort Lane  
Merlin, OR 97532

July 5, 2007

To: All customers using the KH Series transmitter and receiver modules  
Re: End of life notice

Dear Customer,

Linx Technologies is discontinuing production of the KH Series transmitter and receiver modules. We will offer a one year last time buy opportunity for all of our current customers from the date of this announcement. Parts may be scheduled for delivery up to six months after the last time buy date on a non-cancellable, non-refundable basis, depending on availability.

The recommended replacement for the KH Series is the KH2 Series. The KH2 is a drop-in replacement and offers better range and performance at a lower price. Complete data guides are available on our web site at [www.linxtechnologies.com](http://www.linxtechnologies.com) as well as pricing for up to 5,000 pieces. Please call for pricing on higher volumes.

We are committed to working closely with our customers to help them successfully migrate to the KH2 Series and to address any questions or concerns.

# Production Change Notification

## End of Life of the KH Series

Publish Date: July 5, 2007

### Type of Change

End of Life

### Products Affected

RXD-315-KH, RXD-418-KH, RXD-433-KH, TXE-315-KH, TXE-418-KH, TXE-433-KH

### Description of Change

Production on the KH Series RF modules will cease.

### Effect of Change

Customers will no longer be able to order the KH Series RF modules after one year from the date of this announcement (July 5, 2008). Orders may be scheduled for delivery up to six months following the last time buy date (January 5, 2009), but will be non-cancelable, non-refundable. Supplies are limited, so all orders are subject to availability of components.

### Additional Information

The drop-in replacement for the KH Series RF modules are the KH2 RF modules. Customers using the KH Series modules should migrate to the KH2 Series modules. This migration will provide cost and performance improvements. Technical support is offered to assist customers in incorporating the KH2 modules into designs currently using the KH modules.
