To: All customers using the HP3 Series master development system (MDEV-900-HP3-xxx-xxx)

Re: End of life notice

Dear customer,

Effective immediately, Linx Technologies is discontinuing production of the HP3 Series master development system (MDEV-900-HP3-xxx-xxx). The HP3 Series modules (TXM-900-HP3-xxx and RXM-900-HP3-xxx) will be discontinued later this year. Because master development systems are used to prototype and test HP3 Series modules in new designs, we do not anticipate a final buy.

To replace the HP3 Series master development system, we recommend the NT Series master development system (MDEV-900-NT), which will be released on May 21, 2012. For most applications, the NT Series transceiver (TRM-900-NT) performs just as well or better than the HP3 Series transmitter and receiver while using fewer components.

We will work closely with customers using the HP3 Series to ensure that the migration to the NT Series goes smoothly. For pricing or more information, call +1 800 736 6677 (+1 541 471 6256 outside the United States) or email info@linxtechnologies.com. Data guides are available at www.linxtechnologies.com.
