To: All customers using 418 MHz and 433 MHz CMD Keyfob Transmitter products

Re: End Of Life notice

Dear customer,

Linx Technologies is discontinuing production of the existing design of the 418 MHz and 433 MHz CMD Keyfob handheld transmitter products to be replaced by a new generation of keyfobs.

The 418 MHz and 433 MHz versions of the CMD product line are being replaced by HT version of our new OTX Keyfob Transmitter product line. Because of the significant improvements of the device and certain changes to the RF performance, we are unable to replace the old design as a product change notice. We must use new part numbers with new certifications in order to meet FCC and IC regulations.

We will continue to supply product to customers as stock allows.

Transmitters may be scheduled for delivery up to six months after the last time buy date on a non-cancellable, non-refundable basis, depending on availability.

We are committed to working closely with our customers regarding this change. Please contact Linx Sales or Customer Service should you have any questions or concerns.

End of Life Notice for all 418 MHz and 433 MHz CMD Handheld Keyfob Transmitter products
