Re: Product Change Notice – Connector Part Number Rationalization

Dear customer,

Linx Technologies is announcing a change in the part number nomenclature and/or finish of the CONSMA001-SMD, CONSMA001-SMD-N, CONREVSMA001-SMD and CONREVSMA001-SMD-N connectors. Due to inconsistencies in the original part numbering scheme with our connectors we are realigning the above parts to improve part numbering consistency and reduce confusion.

With the introduction of our gold plated SMA and Reverse Polarity SMA connector line, we have classified all gold SMA and Reverse Polarity SMA connectors to have a “-G” at the end of the part number to identify it as Gold. Any SMA and Reverse Polarity SMA connector part number that does not have this “-G” at the end is, by definition, nickel plated.

We do apologize for this inconvenience but strongly believe that this correction now will make things easier in the future.

We are committed to working closely with our customers during the transition to address any questions or concerns. Please do not hesitate to contact us if you have any questions regarding this important matter.
