To: All customers using the LICAL-TRC-MT Transcoder

Re: Product change notice

Dear customer,

Linx Technologies is announcing a change in operation of the LICAL-TRC-MT Transcoder. Product starting with Lot Code **14xxxxx** will ship with an empty address; the manufacturer will need to create a random address manually prior to use. The manufacturer will still be able to load specific addresses manually via the serial command.

Additionally, a bug is fixed regarding the *Write Next User ID* serial interface command documented in the MT Series Transcoder Module Data Guide. After using this command, learned address failed to be recognized. Product starting with Lot Code **14xxxxx** will have the correct implementation meeting the documented functionality.

We are committed to working closely with our customers regarding this change. Please contact Linx Sales or Customer Service should you have any questions or concerns.

## **Product Change Notice for LICAL-TRC-MT**

PCN #: LPCN-140414

Publish Date: April 14, 2014

### **Type of Change**

Firmware operation change

### **Products Affected**

- LICAL-TRC-MT
